

KLove radio station is now transmitted by FM 91.9 in Ada and nearby on 88.9 and is heard by myself and many of my neighbors and their children and many who want a 'clean' alternative to today's music. It is a case of what you listen to is what you become sensitized to. KLOVE could be harmed by having LPFM stations take higher priority over the FM translator stations. There are no stations of music available here that I would rather hear than KLOVE.
